EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Kilyk on 7/26/07.

The application has been amended as follows:

Claim 9 has been amended.

The following text in lines 9 and 10 of the claim has been removed: ", an optionally substituted alkenyl group, an optionally substituted aryl group, or an optionally substituted aralkyl group,"

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Closest art is Jackstell et al. (*Angew. Chem. Int. Ed.* **2002**, 41(6), pages 986-989). Jackstell et al. teach a telomerization reaction in the presence of a palladium catalyst and an alkali metal comprising base (see experimental section on page 988). However they do not teach all the components of the catalyst composition of the instant claim 1. The patentable distinction of the instant invention is the presence of trialkyl isocyanide in the catalyst composition. Applicants have demonstrated unexpected

results of significantly higher turnover frequency when catalytic compositions of the instant invention is utilized in a telomerization process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
